PANEL DISCUSSION FORMAT

90 Minute Panel Discussion

@ 15 Minutes Per Topic

Moderator – Present Questions/Topic to Panel

Audience – Contributions/Questions Follow ups

Final 10-15 minutes if time – Open Forum

AREA OF FOCUS: WELLNESS AND CULTURE

Speaking from your Experience – what are some strategies you can focus on to improve overall wellness and burnout in the Hospital and Practice Environment? Focus specifically on

- Physicians/Faculty
- Nursing
- Other (technical/ancillary, etc.)

AREA OF FOCUS: DATA AND ANALYTICS

How are you approaching artificial intelligence solutions at your institutions/practice? What are the near- term opportunities? Longer term? What are some concerns you may have as AI becomes more sophisticated?

How are current technological advances impacting your care delivery models? Focus on any specific are - Outpatient, Telecommunication and Home Monitoring, Inpatient, Imaging, Procedural.

What do you see as potentially major disruptive technologies that will change the care models and overall care delivery in the future?

AREA OF FOCUS: PATIENT AND FAMILY EXPERIENCE

What are some strategies your hospital/practice have developed to involve patients and families to improve care and overall experience in your inpatient or outpatient environment?

What tools have you developed or found to enhance this process?

AREA OF FOCUS: TEAMS AND COLLABORATION

Given the often-siloed nature of our institutions – discuss some ideas/practices that you have employed or learned about that have been effective in building cross team collaboration.

Focus on clinical care, quality improvement operational efficiency, patient family experience, research and innovation, or other areas.

AREA OF FOCUS: LEADERSHIP

Speaking from your experience -What advice would you give emerging leaders in today's healthcare environment?

What are some specific areas of growth you think would be important to focus on?

AREA OF FOCUS: IF YOU COULD....

If you had a “magic wand” and could solve ONE major problem facing our field – what would it be and how would you solve it?
