## The Traveling Cath Lab

Let's bringing the lab  
to the patient instead  
of bringing the  
patient to the lab...

# PLOT

- ***The Sisterhood of the Traveling ~~Pants~~ Cathlab*** is a 21<sup>st</sup> Century American coming-of-age procedure co-directed by The Cath Lab Team and NICU. It stars Nurses, Interventionalists, Respiratory Therapists, Anesthesiologists, NICU Physicians, and Echo Sonographers.
- Follows a team of dedicated individuals who use a mysterious “pair of pants” (Mobile Cath lab) that fits the needs of each patient despite their size and location.

# THE SOLUTION: SISTERHOOD OF TRAVELING CATH LAB

- **Mobile Cardiac Lab for NICU:**
  - A dedicated, mobile unit designed to bring catheterization procedures directly to the NICU.
- **How It Works:**
  - Fully equipped with advanced diagnostic and therapeutic tools.
  - Trained medical teams bring the lab to the baby's bedside.

# KEY FEATURES OF THE MOBILE CATH LAB

- **Advanced Equipment:**
  - Portable fluoroscopy, echocardiogram and cath lab equipment brought to the bedside.
- **Compact & Specialized:**
  - Space-efficient design tailored for neonatal care.
- **Safety Protocols:**
  - Enhanced monitoring and specialized equipment to keep neonates stable.

# SISTERHOOD – MORE THAN A TEAM

# THE SISTERHOOD CONCEPT

- **What Makes It Special:**
  - The "Sisterhood" aspect focuses on collaboration, support, and shared knowledge.
- **Collaboration Among Specialists:**
  - Pediatric cardiologists, neonatal nurses, and surgeons work in harmony.
- **Supportive Network:**
  - Teams across hospitals can communicate and collaborate on cases, ensuring top-notch care.
